

### For Work That's a Pain in the Neck!

Neck Guard is a durable, lightweight ergonomic device that offers comfort and support when performing overhead work. Whether you're painting a ceiling or dropping a transmission, Neck Guard will save your neck!

- Mechanics
- Plumbers
- Electricians
- Painters
- Plasterers
- Drywallers
- Carpenters
- DIY Projects

### How does it help?

The Neck Guard eliminates strain and fatigue in the neck by providing a comfortable surface to rest your head on while performing overhead work. The flexible mesh hammock cradles your head while looking upward, allowing you to work for as long as needed.

Neck Guard also reduces the possibility of sustaining an injury when working overhead on a regular basis. The Neck Guard can help relieve or prevent\*

- ✓ Neck strain
- ✓ Spinal injury
- ✓ Muscle fatigue
